KEEPING STAFF & PATIENTS SAFE

NABET

Insure your Infection risk

The post COVID environment needs an improved focus on preventing and controlling infections in healthcare settings.

Even in normal situations 1 in 10 patients receive infection while receiving care in a health care setting according to WHO.

10%	50%	30%
PATIENTS GET INFECTION WHEN RECEIVING CARE	SURGICAL SITE INFECTIONS CAN BE ANTI-BIOTIC RESISTANT	EFFECTIVE PREVENTION & CONTROL REDUCES HAI BY 30%

SOURCE : WHO.

The basic elements of an infection prevention program are designed to prevent the spread of infection on healthcare settings. When these elements are present and practiced consistently the risk of infection among patients and healthcare personnel is reduced.
SOURCE : CDC.

Create a culture of continuous monitoring and implementation of practices within your hospital and reduce the risk of infection.
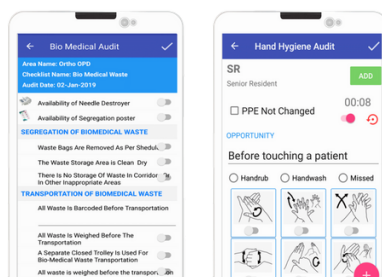

The Ibhar Infection Prevention & Control CORE program helps you implement key processes of monitoring HAND HYGIENE, BIO-MEDICAL WASTE MANAGEMENT, ENVIRONMENT QUALITY and compliance within your hospital facility, The monitoring elements are based on CDC and WHO guidelines.

It also ensures that your staff are fully trained to prevent and control infection.

Implement these practices within 24 hours.
Write to us for more details on our HAI and CLINICAL MICROBIOLOGY modules to complete your Infection Prevention and Control program.

▶ Take an assessment on your hospital's preparedness status based on CDC evaluation guidelines..
